DETAILED ACTION

Status of the Claims

This action is in response to the restriction election filed on March 24, 2005. Claims
 8 are pending. Claims 1-5 are canceled.

Specification

2. The disclosure is objected to because of the following informalities: In BRIEF DESCRIPTION OF DRAWINGS section, the applicant fails to describe figure 12. Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 lines 15-19 recites "said information processing apparatus in a shop encrypting said monetary amount appended with a signature of said user device with said temporary key and transmitting the encrypted monetary amount to said information processing apparatus in a shop". It does not make sense that "said information processing apparatus" transmits the encrypted monetary amount to itself. Furthermore, it is not clear where "said information processing apparatus" gets "a signature of said user device". Does it refer to the signature that is mentioned in line 8 of the claim. If

they are not the same signature, applicant should clarify that how said information processing apparatus obtained "a signature of said user device" as claimed in line 16.

Claims 6 lines 20-21 recites "decrypting said encrypted monetary amount". It is not clear if "said encrypted monetary amount" refers to the encrypted monetary amount mentioned in line 6 or in lines 15-16.

Claim 7 recites the phrase "the monetary amount". It is not clear which monetary amount it refers to since the applicant has claimed numerous times of "monetary amount" in the independent claim 6.

Claim 8 recites the limitation "said number unique to said user device" in lines 15-16. There is insufficient antecedent basis for this limitation in the claim. Applicant is suggested to change the phrase "a number unique to said information processing" in lines 10-11 to "a number unique to said user device" for overcoming this rejection.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 6-7 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural

Art Unit: 3621

phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to pass muster, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, claims 6-7 only recite an abstract idea. The recited steps of merely transferring money does not apply, involve, use, or advance the technological arts since all of the recited steps can be performed in the mind of the user or by use of a pencil and paper. These steps only constitute an idea of how to safely transfer money.

Additionally, for a claimed invention to be statutory, the claimed invention must produce a useful, concrete, and tangible result. In the present case, the claimed invention adding and subtracting monetary amounts (i.e., useful, concrete and tangible).

Although the recited process produces a useful, concrete, and tangible result, since the claimed invention, as a whole, is not within the technological arts as explained above, claims 6-7 are deemed to be directed to non-statutory subject matter. Applicant is advised to implement computer technology into the independent claim 6 in order to overcome the rejections, such as "electronically encrypting a monetary amount...", "electronic transmitting the monetary amount...".

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3621.

Bernstein (U. S. Patent 5,915,023) discloses automatic portable controller for remotely arranging for transfer value to a recipient.

Denno et al. (U. S. Patent 6,128,391) discloses asymmetric key management in cryptographic system.

Downs et al. (U. S. Patent 6,226,618) discloses electronic content delivery system.

Davis et al. (U. S. Patent 6,282,522) discloses internet payment system using smart card.

Dent (U. S. Patent 6,311,171) discloses symmetrically-secured electronic communication system.

Camp et al. (U. S. Patent 6,317,729) discloses certifying delivery of secure electronic transactions.

Baba (EP 0 791 901 A2) discloses network transaction system.

Inquire

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary Cheung whose telephone number is 571-272-6705. The examiner can normally be reached on M-Th (10:00-7:30) Second Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
